

PhpStorm interpreter

Guide 02

Open Settings

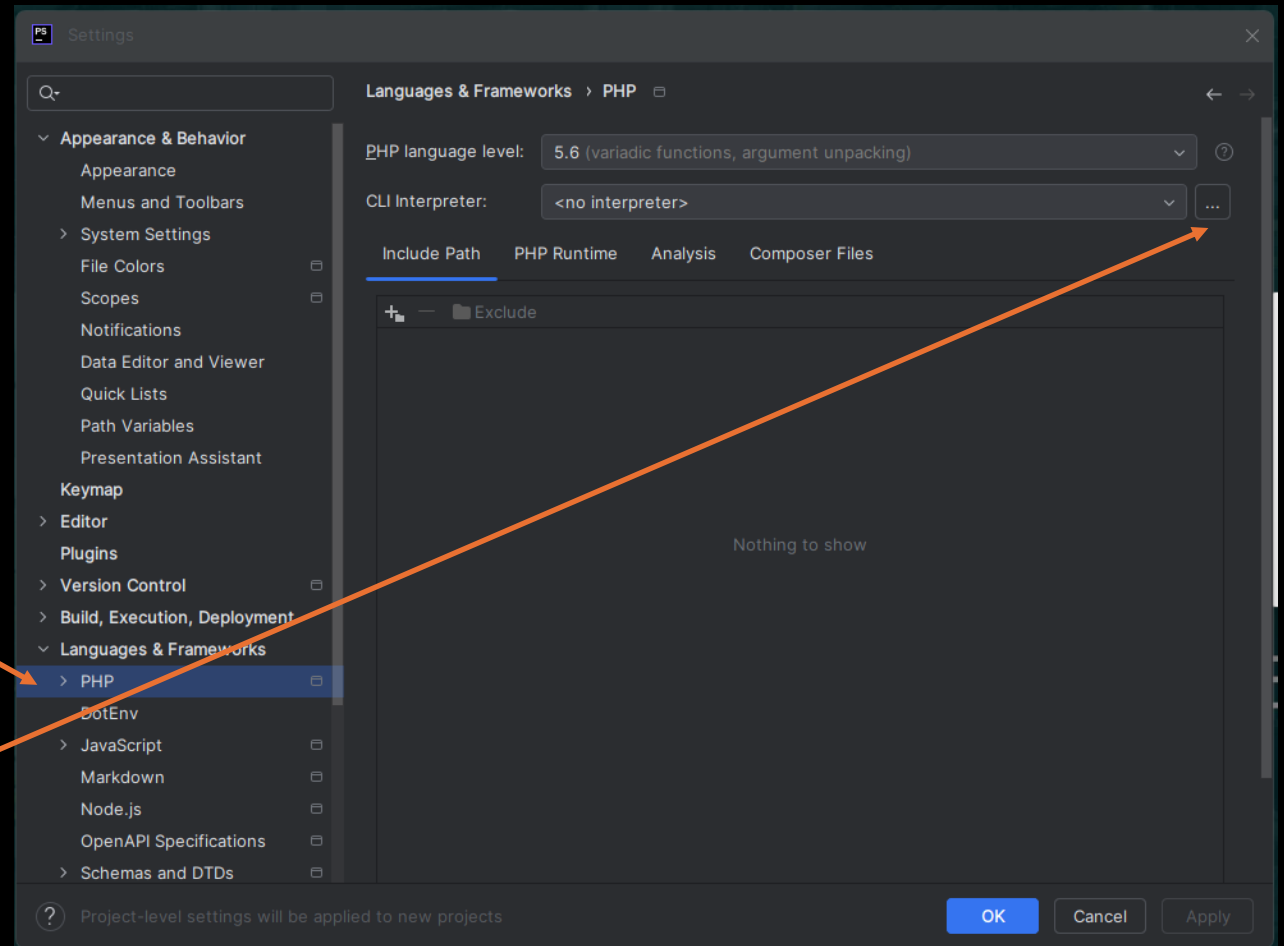

Open settings
from here

Navigate to PHP screen

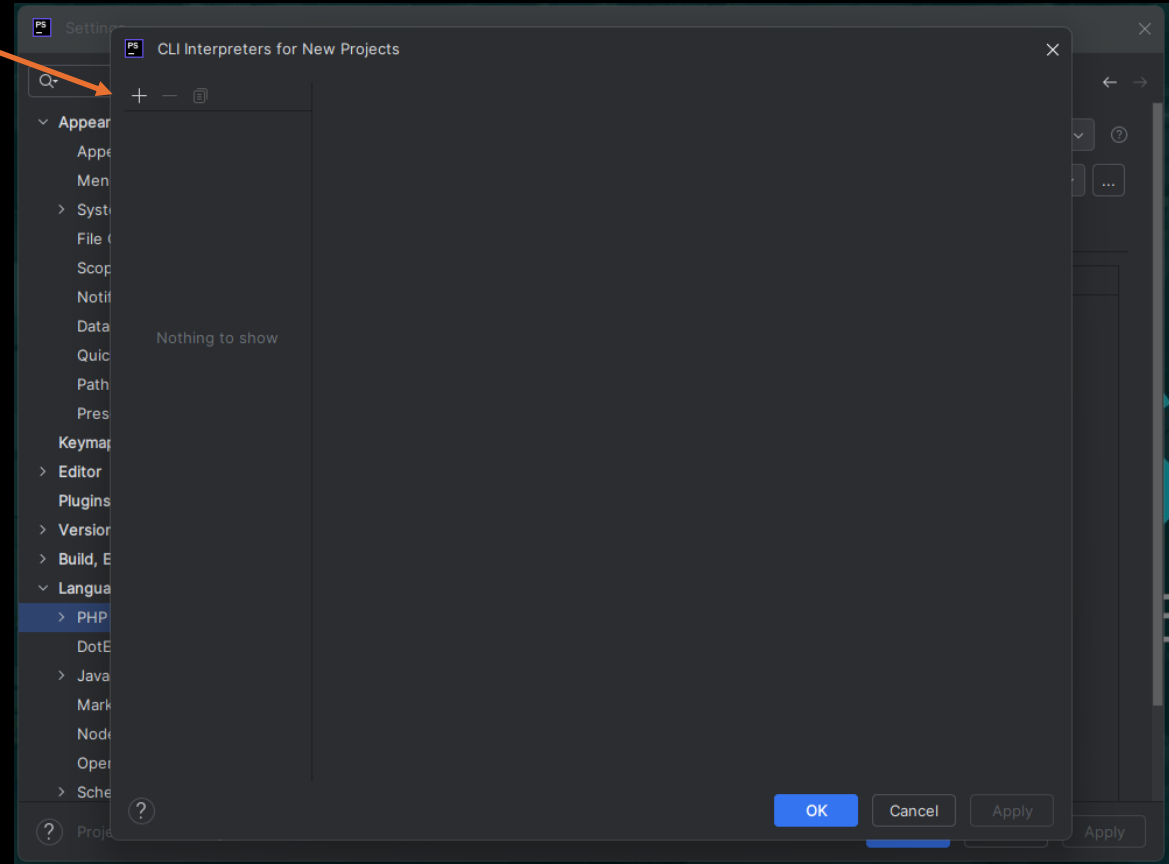

1. Under "Languages & Frameworks"
Click "PHP" to get this screen

2. Then click the 3 dots

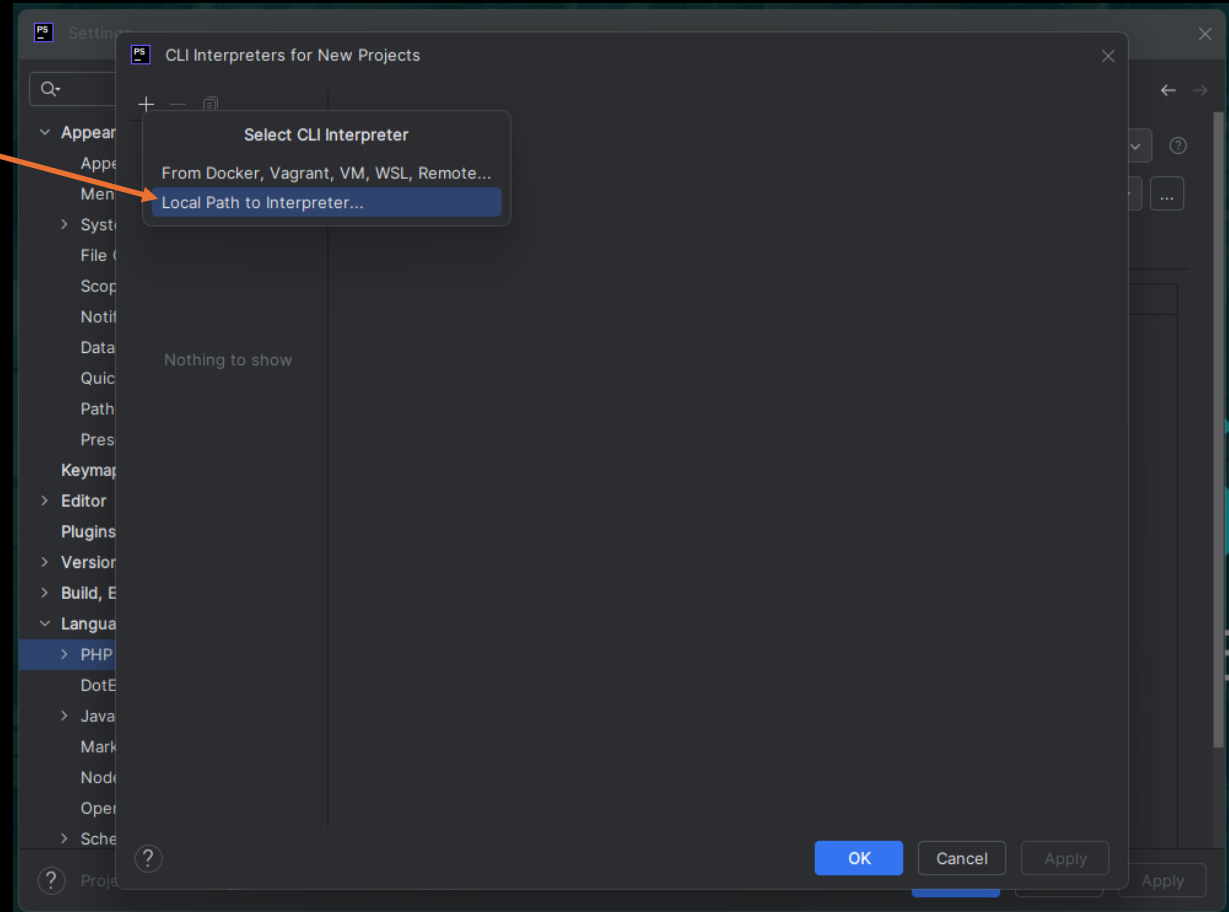

Add the Laragon interpreter

Click on the "+" button

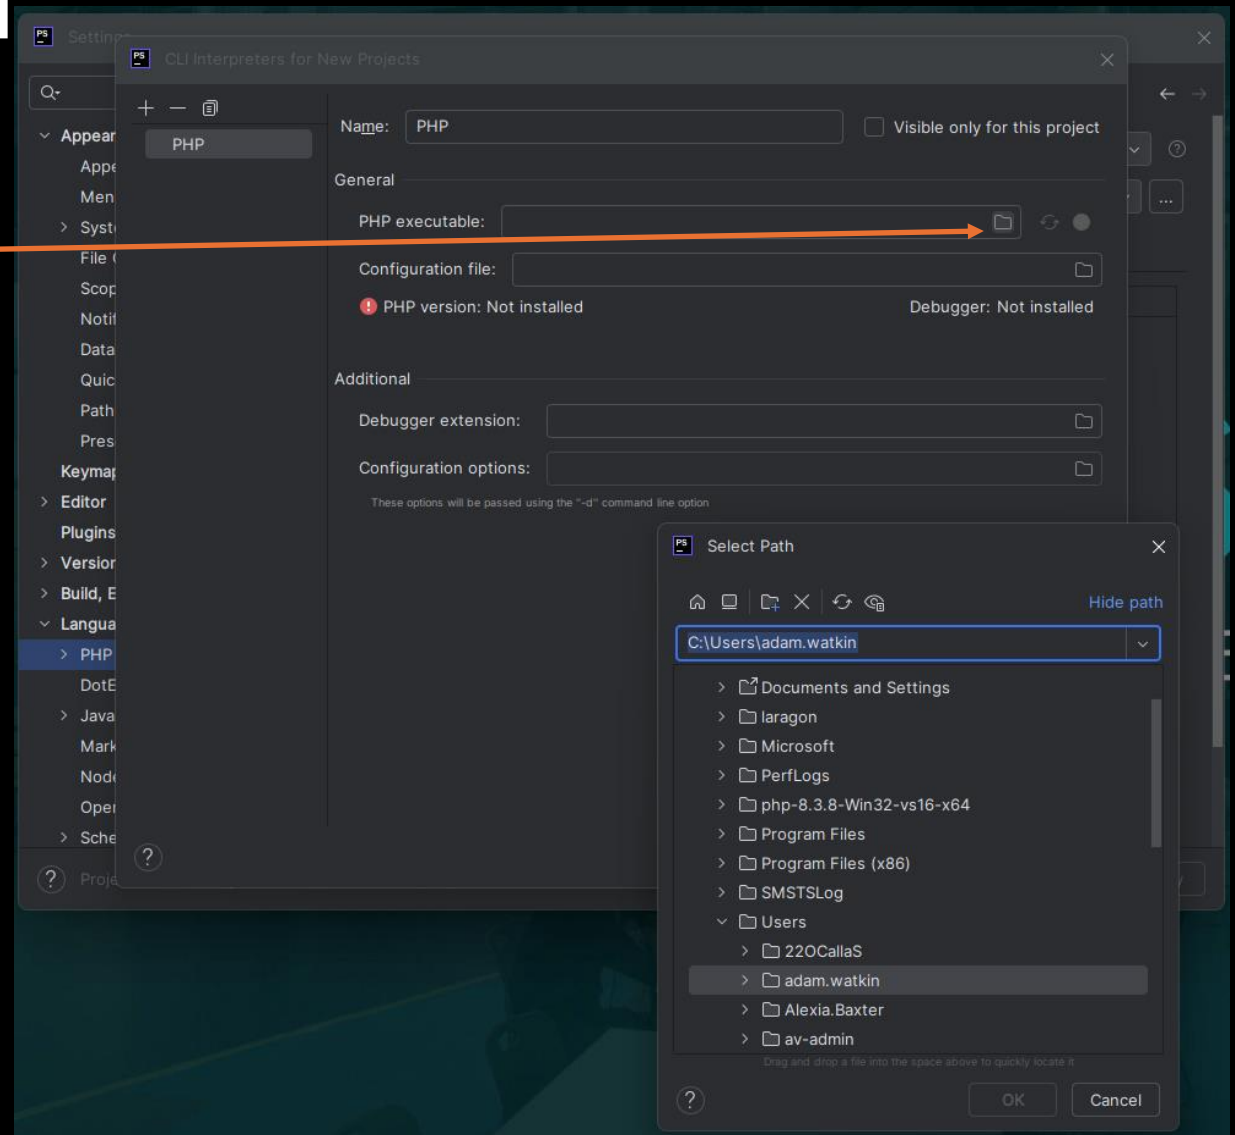

Local path to interpreter

Click this option

Open the file browser

Click here to open the "Select Path" window

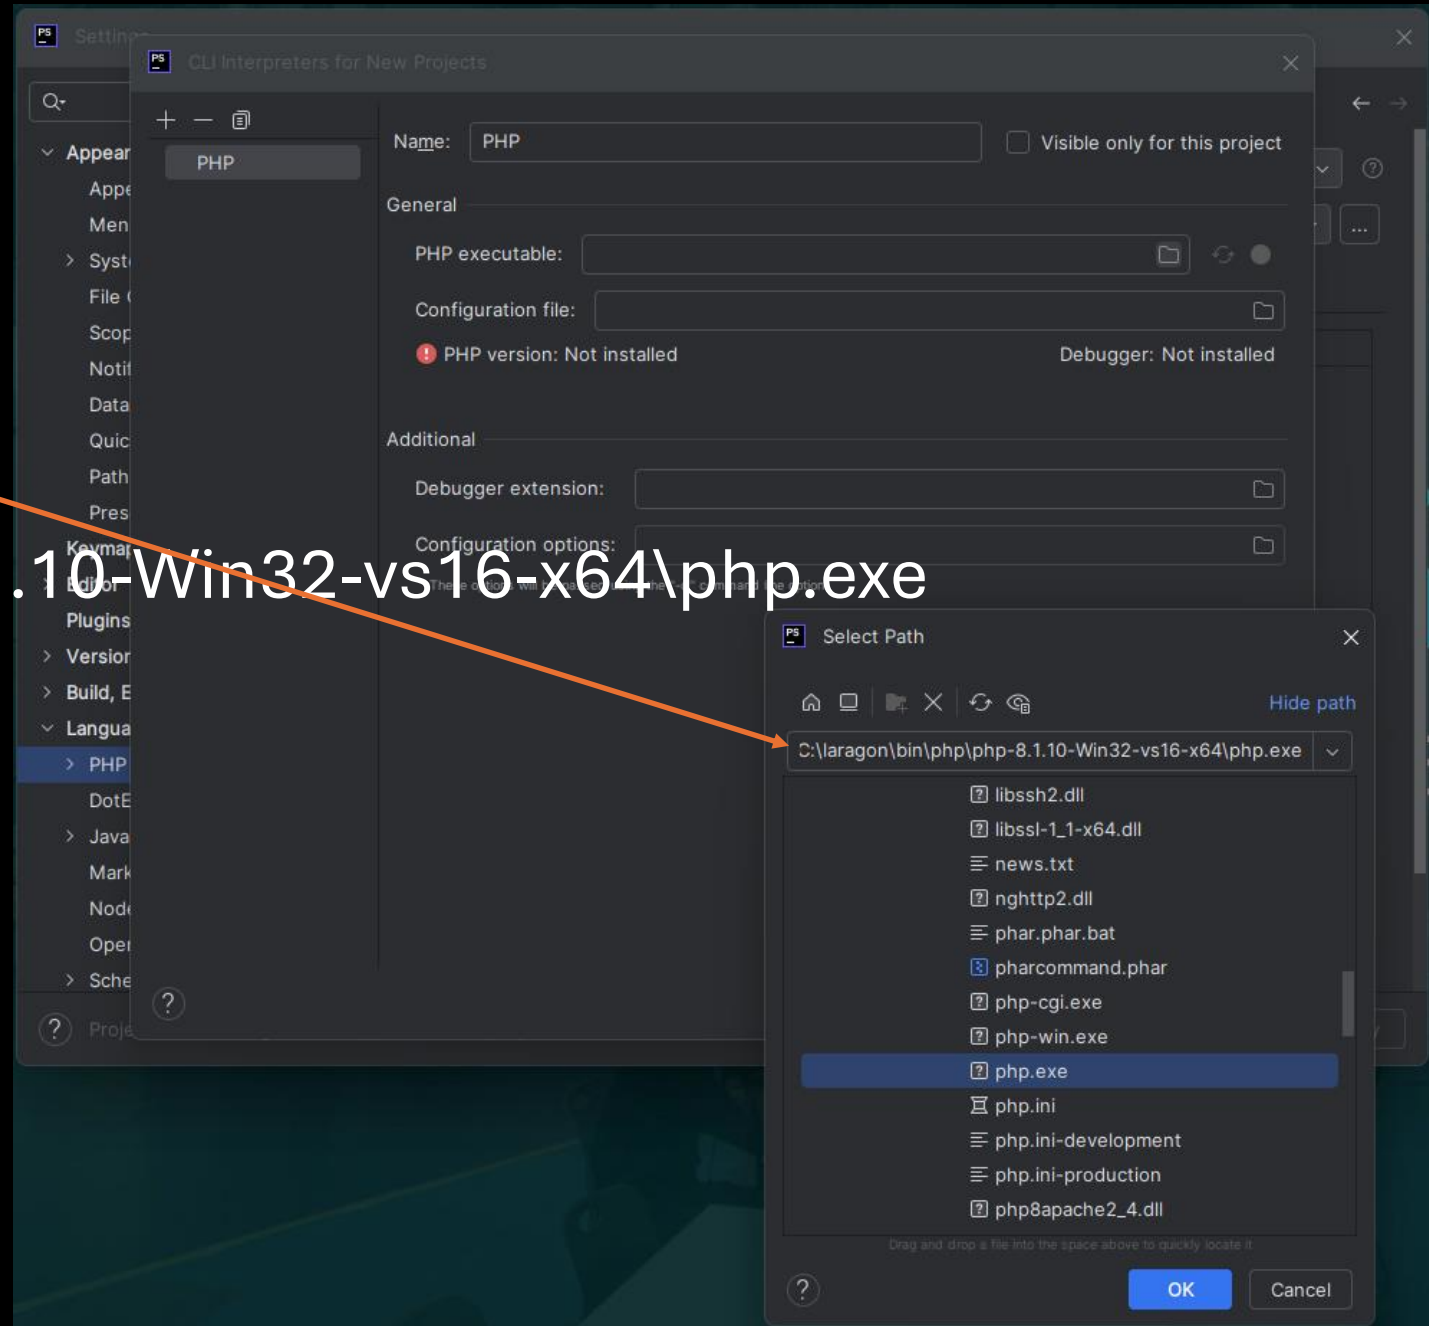

Locate the exe

Navigate here:

C:\laragon\bin\php\php-8.1.10-Win32-vs16-x64\php.exe

Click ok

Apply and ok

Once the executable appears here, click "Apply" and then "ok"

Then close settings and
You are ready to code.
