

# Exporting SQL

Guide 06

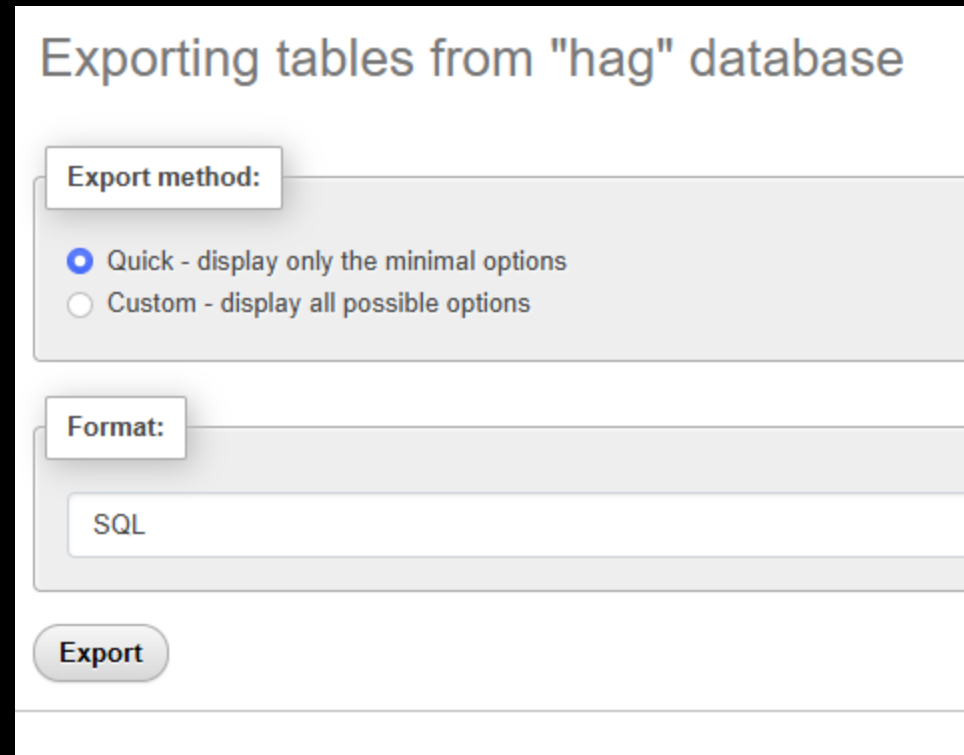

# To export your database

- Click "export"

# Choose your options

- Quick will give you everything, more or less
- Custom will allow you to select what you want.

Exporting tables from "hag" database

Export method:

☒ Quick - display only the minimal options

☐ Custom - display all possible options

Format:

SQL

Export

The screenshot shows a web interface for exporting data from a database named "hag". It features two main sections: "Export method" and "Format". In the "Export method" section, the "Quick" option is selected, which is described as "display only the minimal options", while the "Custom" option, described as "display all possible options", is unselected. The "Format" section shows "SQL" as the selected output format. An "Export" button is located at the bottom of the form.
